consistent strength

superior bonding

long-term durability

About us

At Vasuki Cement, we believe cement is not just a material -it is the foundation of progress.

Manufactured with strict quality control and advanced technology, Vasuki Cement products are engineered to deliver consistent strength, superior bonding, and long-term durability across diverse construction needs.

Guided by innovation and responsibility, Vasuki Cement supports modern infrastructure while respecting the environment.

Aadhunik Nirman Ki Pehchan
a commitment to modern building standards and lasting trust.

Why **Vasuki Cement** Why Builders Trust **Vasuki**

Consistent quality across every batch

Engineered strength for long-life structures

Excellent workability and smooth finish

Suitable for residential, commercial & infrastructure projects

Environment-conscious manufacturing practice

Every Vasuki product is designed to perform on-site, on-time, and under pressure-giving engineers, contractors, and homeowners complete confidence.

Product Range Overview Our Product Portfolio

PPC

OPC

PSC

GGBS

Vasuki Cement offers a comprehensive range of cement solutions tailored for modern construction challenges—from everyday housing to heavy infrastructure and sustainable development.

Each product is formulated to meet specific structural requirements, ensuring efficiency, durability, and performance at every stage of construction.

VASUKI PPC

(Eco-friendly Flyash-based)

Eco-friendly Flyash-based Cement

Designed for durability and sustainability, Vasuki PPC offers excellent workability, reduced heat of hydration, and enhanced long-term strength.

Key Benefits:

- Improved resistance to cracks
- Smooth finish and superior bonding
- Ideal for residential & commercial construction
- Supports eco-friendly building practices

Best suited for

Foundations, masonry work, plastering, and general construction.

VASUKI OPC-53 Grade

(High-strength cement)

High-strength Cement

Vasuki OPC delivers high early strength, making it ideal for projects requiring faster construction cycles and robust structural performance.

Advantages:

High compressive strength

Faster setting and early load-bearing

Suitable for RCC work and structural components

VASUKI PSC (Superior Slag Cement)

Superior Slag Cement

Formulated for demanding environments, Vasuki PSC offers exceptional durability and resistance to aggressive conditions.

Advantages:

Excellent resistance to sulphate & chloride attacks

Lower heat of hydration

Ideal for marine, coastal & industrial projects

VASUKI GGBS

& Sustainability

Premium Sustainable Quality

Vasuki GGBS enhances concrete performance while significantly reducing environmental impact. It improves durability, strength, and lifespan of structures.

Key Benefits:

- Increased durability and density
- Reduced permeability
- Lower carbon footprint
- Ideal for sustainable and large-scale infrastructure projects

Sustainable By Design

Vasuki Cement promotes responsible construction through efficient resource utilization and environmentally conscious manufacturing.

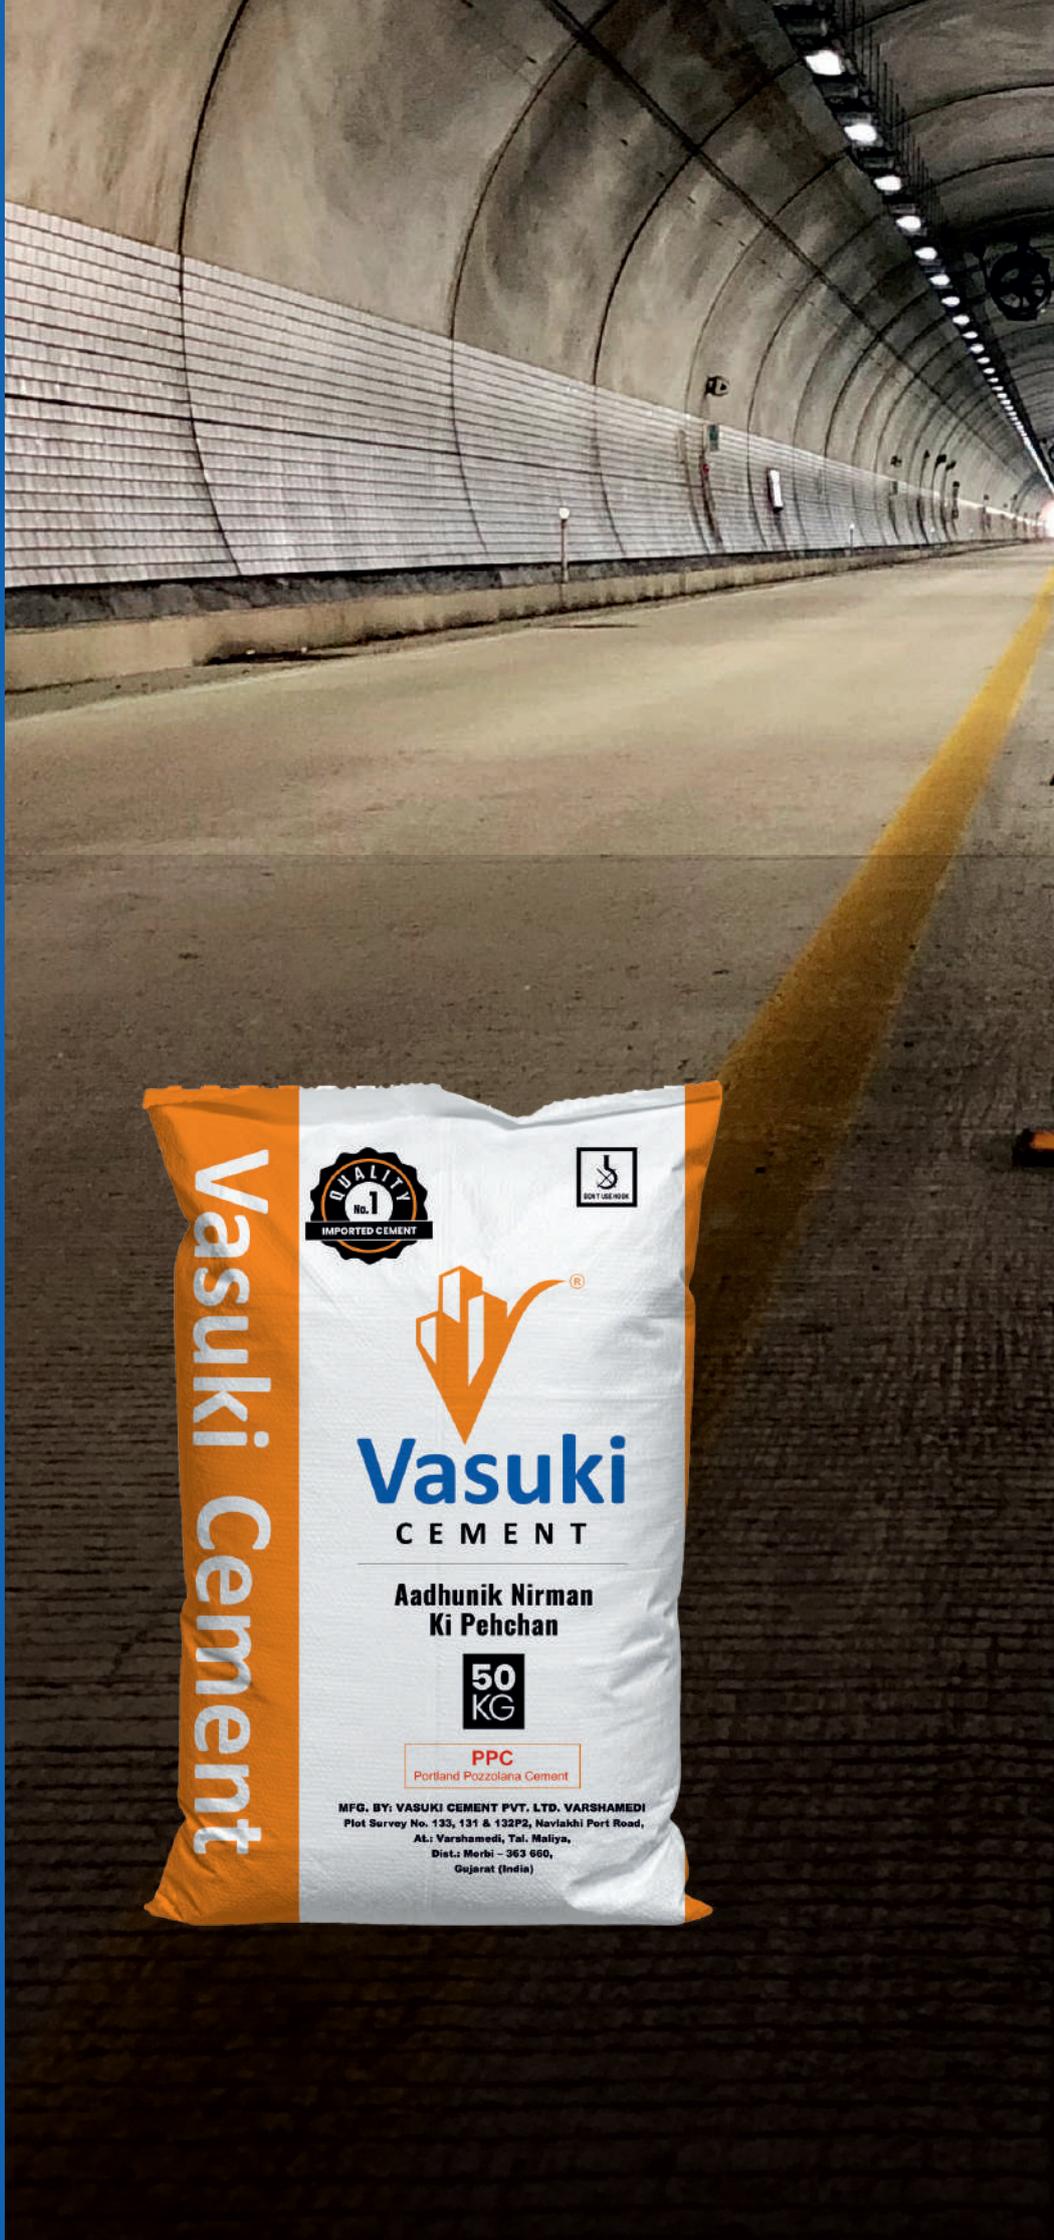

Quality, Applications & Closing Quality You Can Trust

Every bag of Vasuki Cement undergoes strict quality checks to meet industry standards and ensure reliable performance at site.

Application Areas

Aadhunik Nirman Ki Pehchan

VASUKI CEMENT PVT. LTD.
